accepting or rejecting the accepted tender without assigning any reason therefor. There is no binding that only the highest tender will be accepted.

(3) Immediately after the tender is finally accepted by the General Manager intimation will be sent to the successful tenderer by the Food Controller. He is then required to deposit the whole amount exclusive of the earnest money within three days of the receipt of intimation by him and arrange to remove all the bags within eight days. Failure to do this will entail for forfeiture of the earnest money.

(4) The earnest money of Rs. 500 will be arranged to be refunded to the unsuccessful tenderers after the acceptance of the tender is fixed on applications to be received by the Food Controller on this behalf enclosing the receipts given by the Chief Auditor, Mysore State Railway, in the first instance.

(5) In the case of the successful tenderer the earnest money deposited by him will be forfeited to Government if he backs out when his tender is accepted and due intimation given to him.

(6) Intending purchasers may inspect the stocks between 3 P.M. and 5 P.M. on any working day at the Railway Central Depot at Mysore.

793 B. M. KRISHNAN, *Food Controller.*

Enquiry No. 7969--E. D. 963.

Metering Equipment for Post-war development scheme.

Gentlemen,

No. S. P. C. 13758-87. I write to request you to intimate your best present day prices and the earliest time of delivery for the following metering equipment.

Specifications for the supply of 66-kV and 33-kV., 3-phase. 3-wire, metering equipment.

These metering equipments are proposed to be installed in the areas covered by the Mudhugiri Taluk of the Tumkur District and the Jagalur Taluk of the Chitaldrug District, Mysore State. These places have scanty rain fall throughout the year and are subject to severe tropical weather conditions, dust storms, etc., the maximum temperature reaching 140° F in the sun. The equipments that are proposed to be supplied should withstand the extreme climate as described above :—

A: 66-kV, 50 Cycle Metering equipment :—

One—66-kV., 50 Cycle metering equipment consisting of—

(1) One—3 phase or 2 single phase, 50-cy. out-door voltage transformers of suitable V. A. rating with H. T. fusible disconnecting switches.
(ii) Two—50-cy. out-door current transformer of suitable V.A. rating.
(iii) One—Out-door metering cabinet in which the following equipments are to be mounted :—
(a) One Ammeter suitably scaled.
(b) One Volt-meter do
(c) One recording Power Factor Meter do
(d) One Kilowatt Meter suitably scaled.
(e) One Kilowatt-hour Meter do
(f) One 30-minute maximum demand indicator.

These equipments should be liberally rated and of adequate capacity to measure a load of 1000-KVA. to 7500-KVA.

The two out-door current transformers should be supplied with two windings each, providing different ratios in order that the equipment may at first be used with a Load not exceeding 1000-kVA. and later on to measure a load of 7,500-kVA.

The ammeter and Kilo-watt Meter should also be suitably scaled for both loads of 1,000 and 7,500-kVA.

B : 33-kV. 25/50 Cy. metering equipment :—

One—Equipment similar to the above but suitable for initial operation on 25-cycles and ultimate operation on 50-cycles. For conversion, any further additional instruments, etc., that may be necessary should also be quoted.

The equipment should be liberally rated and be of adequate capacity to measure loads up to 1,000-kVA.

The two out-door current transformers should be supplied with two windings each, providing different ratios in order that the equipment may at first be used with a load not exceeding 500-kVA. and later on to measure a load of 1,000-kVA.

The Ammeter and Kilo-watt Meter should also be suitably sealed for both loads of 500 and 1,000-kVA.

The instrument transformers that are proposed to be supplied should conform strictly to the latest B. S. S. and A. I. E. E. standards. The classes of insulation and classes of accuracy of the instrument transformers and measuring instruments respectively should also be stated. The insulation level of all apparatus to be supplied should be adequate to co-relate with the levels of the existing apparatus connected to the 66-kV and 33-kV lines.

It is proposed to have 4 discs for Suspension and five for Strain Strings for 66-kV. Transmission lines and three and four respectively for 33-kV. lines. The discs are either of Locks O.B. type and their technical particulars are furnished below.

Locks.—Cat. No. 580 Rugular type Suspension Insulator, 10" dia 5-¾" spacing Clevis type, Mechanical and Electrical strength 15,000 lbs.—Dry flashover, 80,000 volts, Wet flashover 50 000 volts, Leakage distance 12" Impact Strength 56 inch pounds, puncture strength—130 kV.

Impulse Flashover :—

1 Units	... 150 kV.	4 Units	... 450 kV.
5 do	... 535 kV.	7 Do	... 705 kV.
8 do	... 790 kV.		

Approximate shipping weight 12 lbs. each packed in crates of 6.

O.B. Procelain Supension Insulators, Clevis type 10" dia. 5-¾" section length, Cat. No. 32439, having the following characteristics :

Dry flashover voltage single unit	...	80 kV.
Wet do do	...	50 kV.
Puncture voltage single unit ...	...	125 kV.
Mechanical and Electrical strength minimum	...	15000 lbs.
Impulse Flashover voltage single unit	...	140 kV.
(1·5×40 Micro—second positive wave)		
4 Units	...	440 kV.
5 Do ...	...	525 kV.
7 Do ..	...	695 kV.
8 Do ...	...	780 kV.
Corona voltage single unit ...	...	15 kV.
Leakage distance do ...	...	11¾" kV.

Descriptive leaflets and detailed drawings, if any, pertaining to the equipments to be offered scale sizes V. A. ratings, etc. should also be furnished.

Your quotations should be submitted in duplicate superscribed as "Quotations for Metering Equipment for Post-war Development Scheme" so as to reach this office not later than 28th February 1947.

Hardware Line Materials for Electrification of Channagiri, Pavagada and Madhugiri, etc.

Gentlemen,

No. S P. C. 16163-92. I request you to be so good as to intimate your best present day prices and the earliest time of delivery for the following materials :—

Item No. 1	Galvanised suspension wire clamps each with a minimum of 2 "U" bolts suitable for 2 A.C.S.R. conductor having an overall dia. 0 816 inch. The clamps shall be suitable for attachment to clevis type suspension insulators and to accommodate arcing horns and be proyided with 10 per cent spare "U" bolts and nuts The clamps shall be provided with aluminium liners ..	350	Nos.
,, 2	Do for 2 B&S. for copper conductor but overall diameter 0.2576" without liners ...	650	,,
,, 3	Do for 4 B&S copper 0.2043 inch dia. ...	100	,,
,, 4	Do for 6 do 0 1620 do	650	,,
,, 5	Galvanised strain clamps for 2 A.C.S.R. Item (1) conductor having an overall diameter of 0 816" These clamps shall be suitable for attachment to clevis type suspension insulators with arcing horns (With aluminium liners and 10 per cent spare 'U' bolts and nuts)	80	,,
